

# Lokmane AKKOUH

## Data Engineer | Master 2 in Data Science

Lyon, France | +33 780 750 196 | lokmaneakkouh10@gmail.com | <https://akkouhlokmane.netlify.app/> | [www.linkedin.com/in/lokmane-akkouh](http://www.linkedin.com/in/lokmane-akkouh)

### PROFILE SUMMARY

Data Engineer currently completing a Master's in Data Science. I have a solid background in data engineering, machine learning, and analytics, and I'm seeking an end-of-study internship to apply my skills to real-world data challenges and advance my expertise in modern data technologies.

### EDUCATION

**Faculty of Science and Technology, Claude Bernard Lyon 1 University** 2025 - 2026  
**Master 2 in Data Science** | Relevant Coursework: Data Integration and Quality, Big Data Analytics, Data Mining

**National School of Applied Sciences of Al Hoceima, Abdelmalek Essaâdi University** 2020 - 2025  
**Diploma in Data Engineering** | Relevant Coursework: Databases, Big Data, Machine Learning, Cloud Computing

### WORK EXPERIENCE

**STM GROUP** Tanger, Morocco  
Data Engineering Intern Feb 2025 – Jun 2025

- Built a real-time smart parking management system using Kafka pipelines and PostgreSQL for event tracking and analytics.
- Secured the parking network using Tailscale VPN to ensure private and encrypted communication.
- Deployed the entire solution on DigitalOcean for scalable, cloud-based management and monitoring.
- Tech stack: Python, FastAPI, Debezium, Kafka, PostgreSQL, DigitalOcean, Tailscale VPN, Docker,

**SHIFTBRICKS** Al Hoceima, Morocco  
Data Engineering Intern Jun 2024 – Sep 2024

- Built a data pipeline to process Arabic legal documents using OCR and LLMs, storing structured outputs in MongoDB.
- Automated workflows with Airflow and developed a FARM stack (FastAPI, React, MongoDB) interface for expert validation.
- Containerized the solution using Docker for scalability.
- **Tech stack:** Python, Git, GitLab, MongoDB, Airflow, FastAPI, React, Docker, OCR, LLM

### TECHNICAL SKILLS

- **Programming & Software Engineering:** Python, Java, Spring Boot, Web Development, Git, GitHub,
- **DockerData Engineering & Data Science:** Machine Learning, Deep Learning, NLP, Apache Spark, Hadoop, Talend, Airflow, Data Warehouse, Data Lake
- **Data Management & Visualization:** MySQL, PostgreSQL, MongoDB, Cassandra, Oracle, Microsoft Excel, Power BI

### LATEST PROJECTS

**CI/CD Pipeline for Web App Deployment on Azure**

- Designed and deployed a React-based web application with end-to-end CI/CD on Azure.
- Containerized the app with Docker and managed images via Azure Container Registry.
- Deployed on Azure App Service for high availability and scalability.

**Agricultural Patent Analysis Data Pipeline**

- Built a data pipeline using PySpark for processing agricultural patent data.
- Stored raw and processed data in MongoDB Atlas and PostgreSQL data warehouse.
- Created dynamic Power BI dashboards delivering insights for investors and researchers.

**Laptop Price Prediction Model (Machine Learning Project)**

- Developed a machine learning model to predict laptop prices using Moroccan e-commerce data.
- Handled data collection, cleaning, preprocessing, and validation for accurate predictions.

### CERTIFICATIONS

AWS Cloud Concepts, Big Data with Spark and Hadoop Essentials, Talend Data Integration (Preparation Training)

## **SOFT SKILLS**

---

- Teamwork, Adaptability, Problem-Solving, Strong Communication

## **LANGUAGES**

---

- English (Advanced), French (Advanced), Arabic & Tamazight (Native)

## **HOBBIES**

---

- Reading (Novels, Essays), Team Sports (Football), Technology Watch
